

Beijing Nangong Municipal Solid Waste Incineration Plant Comments and Addenda to the Feasibility Study

Project Description

Under the theme of "Green Olympics" Beijing is undertaking considerable efforts to improve the municipal solid waste management (SWM) system. One component of the planned activities is the realization of a waste to energy (waste incineration) plant adjacent to the Nangong com-posting plant in the South of Beijing until 2008.

KfW, having already supported realization of the Nangong composting plant, is going to provide assistance for the Nangong incineration plant as well. In December 2004, Infrastruktur & Umwelt, was commissioned to assist Beijing Municipal Administration Commission (BMAC) in the preparation of the feasibility study.

Our Services

- Optimization of the technical concept and revision / completion of the feasibility study
- Analysis of the current SWM situation in Beijing Municipality and integration of the incineration plant into the future SWM system
- Assessment of socio-economic impact, financing and cost recovery
- Preparation of documents and calculations regarding Clean Development Mechanisms (CDM)
